

INDIVIDUAL STUDENT'S REPORT OF DAY 5

Name of the laboratory: WELDING LAB					DATE : 13/03/2024				
1) Student Details:									
Name : DAKSHATA R									
Roll No. : 7376232CS128									
Department Year : COMPUTER SCIENCE AND ENGINEERING									
: FIRST YEAR									
2) Training Schedule:									
No. of days		Time							
		8.45 - 10.25		10.40 - 12.20		1.45 - 3.15		3.30-4.30	
1 Day		Introduction to welding skills and Analysing the task given		Startup the process, cutting the Rods and grinding it		Welding the rods at the joints, cheak the strength and posture of the product		assessment	
3)Assessment Schedule:									
Date		Time							
		8.45 - 10.25		10.40 - 12.20		1.45 - 3.15		3.30-4.30	
13.03.2024						Analysing the tasks & making proposed process plan sheet			
		Measure the rods in the desired length and cutting the metal rods into required quantity of pieces		Welding the rods using the mig welding		polishing the edges by using the polisher		assessment	
4) Lab task details:									
S.No		Name of the task			Outcome				
1		Fabrication of a steel structure - Laptop stand model			Make a sucessful model of the Laptop stand using welding with mild steel				
5) Process Plan & Execution:									
Tasks		Proposed Process Plan			Actual Plan executed				
1		Making an outline of the given task and analyse the welding, cutting & polishing techniques involved(2 Hr)			Making an outline of the given task and analyse the welding, cutting & polishing techniques involved(2 Hr)				
3		Marking the 15cm & 30cm of 45 & 30 degree of diagonal pieces of mild steel bu using steel ruler(1Hr)			Marking the 15cm & 30cm of 45 & 30 degree of diagonal pieces of mild steel bu using steel ruler(1Hr)				
4		By using the steel cutter make cuttings of the desired sizes used for our product and polishes the end for more perfectness(2.5 Hr)			By using the steel cutter make cuttings of the desired sizes used for our product and polishes the end for more perfectness(2.5 Hr)				
5		By using the mig welding make the weld the parts into the desired task shape (2Hr 15 min)			By using the mig welding make the weld the parts into the desired task shape (2Hr 15 min)				
6		By using the metal grinder make the edges more polish after the welding process(30 min)			By using the metal grinder make the edges more polish after the welding process(30 min)				
7		Our proct is now fabricated, check the strength and posture of the product (10min)			Our proct is now fabricated, check the strength and posture of the product (10min)				
8		Making reflection sheet and assesment of task given(10 min)			Making reflection sheet and assesment of task given(10 min)				

Student's Signature:

SKILL		
Duration of the skill : 1 DAY		
6) Reflection (Major problems faced/ Troubleshooting):		
Task no	Problems	Counter measures
1	Facing some difficulties in the cutting of mild steel into desired sized pieces	Self learned and resolved
2	Initially it is difficult to handle the mig welding machine and electrode	Self learned and resolved
3	Feel some difficulty in the grinding process of the edges	Self learned and resolved
7) Photographs of the Lab tasks:		
PHOTOGRAPH OF THE TASK GIVEN (after completion)		
		
8) Assessment (Out of 10):		
1	Fabrication of a steel structure - Laptop stand model	
9) Knowledge acquired from tasks:		
Task.No	Skills acquired	
1	To weld and make a new product without fear	
2	To Handle the tools in a proper manner	
3	Handson experience and learned foundational skill.	
4	Learned how to manage the given task in the given time (Time Management)
